

PhotonFX Easy Website Pro 4

Easy Website Pro 4 is the next generation of webdesign software and now also offers I-Phone Website Templates and other powerful Features

Easy Website Pro is new, and different from other Web Authoring Software. You have the unique ability to choose between templates and apply any colors to the background, foreground, text and links and even add Clip-Arts and images in to the layout. You are not bound to predefined template colors or image themes.

The new release comes with powerful features such as **I-Phone Websites, PayPal Button Wizard, W3C Conform HTML Code, Download Branch-Templates** and many more.

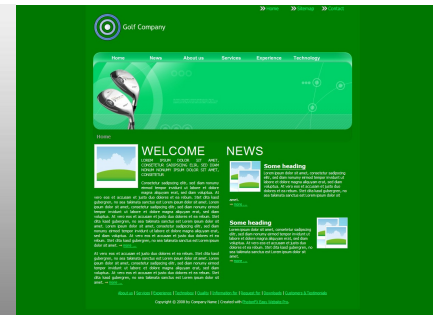

Autu animated nash muros, logos and buttons without any web design knowledge. In a few clicks you can generate your own page contents and sell products with the new PayPal feature.

No HTML knowledge is required. Easy Website Pro 4 has a WYSIWYG (What you see is what you get) editor where you can create thumbnails of your pictures in one click, add links, MP3-Music files, SWF files and even Mpeg Video-Clips to your site. If necessary, you can view and edit the HTML code at any time.

Get higher search listings simply by activating the Meta Tags feature for your websites. Benefit from extras like colored scrollbars, quick navigations and external CSS (Cascading Style Sheets) files.

Easy Website Pro gives you the comfort to publish your website to the Internet directly from the program, without additional FTP software.

Template Samples:
